SUMMARY

Senior Full-Stack Software Engineer with 4+ years of professional experience shipping production applications. Proven track record building and scaling web and mobile platforms end-to-end, from system design and database architecture through deployment. Experienced leading features autonomously across scheduling systems, insurance platforms, and consumer mobile apps.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, C#, Python, SQL, Ruby, PHP

Frontend: React, React Native, Next.js, Vite, Angular, Vue.js, Tailwind CSS, CSS/SASS

Backend & Data: Node.js, .NET, Python, Ruby on Rails, PostgreSQL, Redis, BullMQ, MongoDB, MSSQL, Snowflake, Firebase, Supabase, Prisma, Entity Framework

Infrastructure & Tools: Expo, AWS (Lambda, ECS, S3, RDS, CDK, CloudFormation), CI/CD, Kafka, RabbitMQ, Docker, Terraform, Auth0, Git

PROFESSIONAL EXPERIENCE

Software Engineer II, Clever Benefits *2026 – Present*

- Co-lead full-stack consolidation of a multi-tenant web application servicing multiple insurance providers, built in React and TypeScript on PostgreSQL with Redis and BullMQ for caching and background job processing.
- Lead large-scale feature work end-to-end for the multi-tenant portal, owning architecture, implementation, and delivery across the stack.
- Independently scope features and partner directly with business stakeholders to define, refine, and prioritize requirements without dedicated product management.

Software Developer, Sentry Insurance *May 2024 – March 2026*

- Architected an integration between Workday Adaptive Planning, Workday HCM, and internal systems to create an automated financial control, replacing manual analysis across >300K rows of data.
- Generated >$100K annually in cost savings for the finance team by designing and implementing a systematic approach for updating real-time metrics from Workday via AtScale.
- Co-led modernization of flagship payment processing application, migrating 50K+ lines from Visual Basic to C# and Vue.js, reducing maintenance overhead and improving developer velocity.
- Triaged and resolved critical production payment processing issues across PayPal and JP Morgan Chase integrations, ensuring zero revenue loss during incidents.

Software Engineer, Bluetread *2025 – 2026*

- Built and maintained a full-stack scheduling platform serving 12+ enterprise tenants using Angular, C#/.NET, and MSSQL.
- Owned core data filtering functionality throughout rewrite of frontend scheduling application, improving frontend latency by 20%.
- Architected a data syncing mechanism that reduced sync time by 25% across 12+ tenants, improving data consistency and reducing client-reported sync errors by 30%.
- Independently scoped features, identified edge cases, and challenged requirements without dedicated product management; owned code reviews and production deployments.

Software Engineer, VISIBLE *2025 – Present*

- Maintained a React Native (TypeScript) mobile application with Ruby on Rails backend and Tailwind CSS serving 1500+ active users, independently owning the full product roadmap, scoping, and delivery through App Store and Play Store deployment.
- Owned end-to-end development of 10+ features across the stack including deep linking, spam prevention, and real-time messaging.

Founder & Software Engineer, Orange Cat Media *January 2022 – 2024*

- Architected and deployed full-stack reservation platforms using React, Next.js, Node.js, C#, Prisma, PostgreSQL, and AWS (Lambda, S3, Cognito), generating $130K+ combined annual revenue for clients.

EDUCATION

Master of Science in Computer Science, Georgia Institute of Technology (in progress)*2026 – 2029*

Bachelor of Science in Software Engineering, Western Governors University*2022 – 2025*

Bachelor of Science in Medical Laboratory Science, Michigan Technological University*2018 – 2020*

Published: The use of non-model Drosophila species to study natural variation in TOR pathway signaling. Steenwinkel TE, Hamre KK, Werner T (2022). PLOS ONE.
